

Mirus International Product Highlight AC Inductors and DC Chokes

AC Inductors & DC Chokes

Mirus International has been building AC Inductors and DC chokes as a key part of their filter technology. But only recently have they begun to build and sell these assemblies on their own. Since the reactor/inductor is a key component of the Mirus filter, they have developed a quality manufacturing program... unmatched by industry competitors.

AC Inductors:

Single phase and Three phase through 690V and 3500A... core and coil or enclosed.

DC Chokes:

Through 900V and 3500A, core and coil or enclosed.

Direct Retrofit designs available in all enclosure and core configurations. Enclosures designs include NEMA 1, NEMA 2, NEMA 3R, NEMA 3RE, NEMA 4, and NEMA 4X
For more information, or to have us review an existing inductor design your need replaced, please contact:
